DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/1/2006 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7, 9-12, and 14 rejected under 35 U.S.C. 102(b) as being anticipated by Howland (U.S. Patent No. 5,649,926). Howland discloses a device having a first and second anchor assembly (Figs. 1 and 4), each having a threaded portion (52), each having a cylindrical swing bolt (50), each having a clamp assembly, a portion of which may be considered "C"-shaped (Fig. 1 and item 12) with a cylindrical opening for a rod (82) that is also a passage. Howland also discloses an elongate member that is partially curved (16), and that is also capable of use with the clamp assemblies (see Fig. 1). Howland further discloses clamp assemblies that have an upper and lower portion (see item 10 in Fig. 1), and a screw that has a spherical shoulder (20) that is capable of

allowing the clamp portions to mate, pivot, and rotate with respect to each other in their use attaching vertebrae (Col. 1, lines 55-65). Howland further discloses a swing bolt that has a threaded region (22) opposite the respective first and second screws (in this case the portion screwed into the vertebrae) that allows these regions to be attached to the clamping assemblies in use.

Allowable Subject Matter

Claims 13 are allowed over the prior art.

Response to Arguments

Applicant's arguments filed 8/18/2006 have been fully considered but they are not persuasive. Examiner feels the claims read on the prior art as noted previously.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
